

Editorial Note

The Managing Editors would like to remind the authors of the ethical rules set out in the document of IMU “Best current practices for Journals” (see www.mathunion.org). In particular, we stress the following:

“Authors must abide by high standards of research integrity and good scholarship. It is the responsibility of authors to submit a well written, mathematically correct article, if necessary seeking advice if it is not written in their native language, to clearly describe any novel and non-trivial content, and to suitably acknowledge the contributions of others, including referees. Submission of a paper to a journal implies that it is not currently under consideration by any other journal, and that any substantial overlap with other published or submitted papers is duly acknowledged. In addition authors should be responsive to correspondence with the journal. Multiple authors should communicate fully, speak with one voice, and accept mutual responsibility in their communications with the journal. All authors are expected to have materially contributed to the paper, and to be familiar with its content.”
